

Winning design for Heesterveld

date 16.11.2007

Our design 'mengen en loslaten' ('mix and set 'm free') won the second and final phase of the Ymere / NAI competition 'Heesterveld 1:500'!

The jury chose the design for its convincing concept. On the one hand it mixes different functions, such as housing and leisure, on the other it tries to improve the social economical status of the neighbourhood. The jury praised the theoretical basis of the plan and the possibilities for further development in the future.
